

- S-101 ENC (Electronic Navigational Chart) is the latest technical standard of ENC that is being developed. Users can overlay multiple other S-100 product layers on the ENC and it is expected that the safety and efficiency of navigation will be highly improved.
- International Hydrographic Organization (IHO) is preparing the finalization of S-101 and the International Maritime Organization (IMO) has decided that the S-101 compatible ECDIS can be installed from 2026 and should be installed from 2029 mainly for the new ECDIS mandated vessels.

International time-line for ECDIS installation
